THREATENED BY BOTH ALLIANCES

Greece Will Feel Entente's Hand if She Opposes Use of Railway, and Teutons' if She Allows It.

ATHENS, April 18. - Greece's pres ent difficulties have arisen through the demands of the allies concerning the transportation of the Serbian troops from their present base at Corfu to the

fighting line on the Saloniki front. In the ordinary way transports would have conveyed the Serbs from one point to the other. They would have been shipped at Corfu and three days later disembarked at Soloniki, but the voyage from the west to the east coast of Greece, from the Adriatic to the Agean sea, is today an undertaking full

of peril for troop ships.

The scheme, tentatively approved, has been to bring the Serbs to Pathas, a sea journey of 12 hours by the Corfu canal route, which is comparatively safe. From Patras there is no direct railway line across Greece to reach Larissa, and thence Volno on the east coast. The only available railway route is the Peloppenessian line via

The allies decided to use this railway for the transportation of the Serbs, disembarking at Patras, but the Greek government is offering strong opposition to the scheme. Premier Skouloudis has flatly refused to give his official consent, whereupon he was informed that Greek official sanction was immaterial and the allies would not permit Greek opposition to interfere with their plan of operations.

Greece has on every occasion avowed its intention strictly to preserve her neutrality and avoid taking part in the war on the side of the entente or the central powers, but now she is being threatened by both sets of belligerents at once. The central powers on learning of the resolve of the allies to utilize the Greek railways emphatically intervened, and have in effect told the government that on this occasion mere paper protests will not avail, and if Greece remains passive and permits the Serbian soldiers to reach their base of operations by means of the Patras railways they will regard it as an unfriend-

The allies have let it be known that they also, if necessary, are prepared to have recourse to strong measures should the Greeks seek to thwart the allies' designs. The government now finds itself in a dilemma. It is being threatened by the allies and the central powers and is looking round for means of escape by a peaceful solution from a grave difficulty.

The last word on the subject seems to be with the allied council at Paris. The Greek government professes itself ready to stand by the consequences of its first definite refusal to permit the railway to be used for the carriage of

Serbian soldiers on the way to Salonika. Excitement runs high and every one is wondering what the next move will

SECOND LARGEST

STATE FOREST

C. C. Putnam and Ralph Putnam Convey Addition to Tract Given Last Year-Take Nursery Stock.

The state forestry department has recently received from C. C. Putnam and Ralph Putnam, a deed of 300 acres in the town of Worcester adjoining the area given by them to the state last year. The arrangement made in this case is that the department will ex change nursery stock, of which there is a surplus in the state nursery, for this land. In this way the land is acquired without direct expense to the state and more nursery stock is planted than would be otherwise. This has now become the second largest state forest with an area of 1,400 acres. The Mansfield forest, with an area of 5,000 acres, is the largest owned by the

The forestry department completed a survey last fall of the Putnam forest, including this new area. Plans have been completed for the planting this spring of 150,000 trees, mostly Norway spruce, on certain portions having suitable soil. A camp will be established as soon as the present season is far enough advanced, and about 20 men will be engaged in this refor-

The state now owns altogether about 12 000 acres of forest, most of which is covered with a natural growth of ome bind. It is the policy of the forlands in these areas as rapidly as possible, thereby furnishing examples of forestry work in many localities.

CORPORATION FILES ARTICLES. Purebred Livestock Sales Co. Has \$25,-

000 Capital Stock.

MONTPELIER, April 18, - Articles of association were filed yesterday with the secretary of state by the Purebred Livestock Sales company of Brattleboro, incorporated, with capital stock of \$25,000, the principal place of business to be at Brattleboro. The company purposes to deal in all kinds of merchandise and to publish and circulate newspapers, magazines, etc. The incorporators are G. F. Gregory of Dummerston, A. B. Clapp of Brattleboro, John W. Prentice of Alstead, N. H., and Lewis C. Lovell of Bellows
